Patronate:

The main reasons for the formal development of Polish Association of Veterinary and Critical care were passion, desire of acquisition of new competences in the range of saving health and life of our pupils, growth of veterinary science and techniques and owners expectations. Association is a non-profit organization created by practicing veterinary surgeons whom professional action is connected to active life and health saving of animal patients.

The aim of the Association is dissemination and progress of veterinary emergency and critical care medicine achievements for helping animals and limitation of their suffering.

Our activity is directed to:

Veterinary Surgeons and Veterinary Technicians

Students of Veterinary Universities

Animal owners and guardians

Our activity is based on cooperation with veterinary associations in Poland and abroad, other professional veterinary authorities and veterinary universities.
